

FIELD CARE INSTRUCTIONS

Once the body has cooled off,

GET IT COLD OR FROZEN ASAP!

Your field care will directly effect the quality of your mount! Remember we are dealing with nature

To avoid spoilage, treat the skins as carefully as you treat the meat!

FISH

Take lots of pictures and measurements. Measurements tip to tip, girth and weigh if possible.

SMALL ANIMALS

All animals the size of coyotes and smaller should be frozen whole. Do not gut or try to skin. Allow to cool, place in a plastic bag. Freeze promptly.

DEER & GAMEHEADS

Never cut the throat! Bleeding will not make a difference in the quality of the meat, and you will harm the capel. It is not necessary with a proper field dress. You may leave the entire back hide attached. Let us cut off what we don't need.

Better too much than not enough! Place head with horns attached in a plastic bag and freeze promptly.

ANTELOPE and MT. GOATS: Be very careful not to get excess blood on fur as the hair is tubular and blood is very difficult to remove once it has gotten in the hair shafts.

NEVER ALLOW YOUR TROPHY TO GET WARM OR HOT!

Always cut from the inside of the skin outward to avoid cutting hairs

The better you take care of your animal in the field, the better the mount.

New policies

We will take the best care of your trophies and to do this we need you to be patient. We ask that you do not call and ask about your mount unless necessary. This helps us to be able to work on everyone's mounts. Also please know your pose by the time you leave shop for drop off. And tags and all deposits are due at time of Drop off. And BE KIND! If polices aren't followed you will be asked to pick up your mount and forfeit your deposit.

Completion dates are estimated and subject to change.

50% Deposit required before any work and turnaround times begin.

Mounts not picked up within 60 days of notice may be sold to recover expenses.

Cancellation will result in forfeit of deposit.

Please Read New Policies.
